

Quality Manager @ VISSEIRO (m/f/x)

Are you looking for a new position in a passionate and innovative tech firm?
Are you an experienced and talented Quality Manager with a keen eye for detail?
Are you someone with strong demonstrable experience overseeing quality processes?

Then we have the perfect position for you!

Who are we?

We are VISSEIRO, an exciting and innovative healthcare start-up with a strong focus on changing the space of elderly care. We are proud of our breakthrough, patented technology that can measure vital parameters through a seat cushion, allowing health and vital signs to be monitored easily, effectively and without invasive and uncomfortable processes. With our innovative use of cutting edge artificial intelligence, we aim to detect any deteriorations in health before any severe symptoms occur. We identify as a software company who specialize in the evaluation and recording of medical data generated by our unique cloud-based artificial intelligence.

What will you be doing?

We pride ourselves on our operational superiority. We are looking for highly diligent candidates with excellent attention to detail for the role of quality manager. Quality managers are responsible for monitoring and evaluating internal production processes, examining products to determine their quality, and engaging with customers, and gathering product feedback, among other duties.

Your duties and responsibilities will include the following;

- Understanding customer expectations and needs from a product.
- Designing and implementing application specifications.
- Own the entire process for regulatory.
- Ensuring applications are designed with adherence to legal and safety standards.
- Develop, implement and monitor all documentation relating to development, adhering to ISO 13485 standards.
- Ensure change meetings are fully facilitated including agenda, attendance, minutes and the communication of all relevant documentation.
- Monitoring and evaluating internal production processes.
- Provide support for the improvement and maintenance of the QMS.
- Develop, establish and maintain an effective quality control process and mindset within the company.
- Producing statistical reports on quality standards.
- Reporting to upper management on quality standard issues.

What are we looking for?

Quality managers occupy important positions and will need to be highly conscientious and responsible workers, as defective products could cost our company significant losses.

The following are required for the position;

- Degree in engineering, with a focus on medical technology.
- 5+ years experience in medical device quality management.
- Knowledge of EN ISO 13485.
- Quality control certification advantageous.
- Excellent attention to detail.
- Excellent verbal and written communication in **english and german**.
- Data analysis and statistical aptitude.
- Good interpersonal skills.
- Highly conscientious and diligent.

This is an excellent opportunity for someone with previous experience in the industry who is looking to join an exciting and innovative company, and use their talents and experience to build something amazing. We are able to offer a competitive start salary and an excellent, social working environment alongside a range benefits to make this truly an amazing place to work!

If you are interested in applying for this position or want to find out more information then get in touch and we can take it from there

Start date: immediately, Application in english or german
